This document is a guide for comparison purposes only. Complete Technical Support, including free and easy to use ErosionWorks design software, is available at www.Curlex.com or contact AEC for specific project recommendations. "Material Equivalents" are based on Manufacture's material specifications and published field ratings. Products in this chart are by no means to be considered exact "equivalents" as properties may not be identical in every case. Project specific performance requirements should be verified with the Engineer and all "Performance Equivalents" should be determined by the Engineer.
