

American Excelsior Company®

Erosion and Sediment Control Products

How Green is Your Footprint?®

American Excelsior's Eco-Sustainable™ Products

Sustainable

Curlex® and Straw - ECB's led by Curlex products. First photo shows product after application. Second photo shows vegetation growing through product.

Curlex® Sediment Log® - Filter contaminated runoff, retain sediment, reduce velocity using biodegradable fibers.

Environmentally Friendly

ECB's made with **Ecocycle™** Technology and Curlex with **NatureZone™** Nettings.

Bindex™ Family of Hydraulic Mulches with Curlex Fibers for hydraulic applications.

Curlex® NetFree™ - ECB without netting and made from biodegradable wood fibers.

100% Biodegradable

Curlex® NetFree™ - ECB without netting and made from biodegradable wood fibers.

E-Staple® - Biodegradable staple to anchor rolled erosion control products to the soil.

AEC's **FibreNet™** product line available with wood excelsior, straw, and coconut fiber matrix.

Recycled Materials

Approximately eighteen (18) plastic bottles are diverted from landfills for every pound of **Recyclex®** fibers.

Recyclex® TRM and TRM - V - Fibers made from 100% post-consumer goods (recycled bottles).

Vegetated **Recyclex® TRM** test channel at ErosionLab.

Ecocycle™ Technology and NatureZone™ are Trademarks of Conwed Plastics, LLC

American Excelsior Company®

Erosion and Sediment Control Products

How Green is Your Footprint?®

American Excelsior's Eco-Sustainable™ Products

With the increasing need to protect our environment and meet federal regulations, wouldn't it be nice to have just one source to provide you with all your erosion and sediment control products and design needs? With American Excelsior's **Eco-Sustainable line**, you now have a family of products backed by proven performance.

LEED® Points

American Excelsior Company has established its Eco-Sustainable Product line to help site owners earn LEED points. Our products can help contribute toward U.S. Green Council's Leadership in Energy and Environmental Design (LEED) Green Building Rating System™ points to help your project achieve its LEED certification. See our LEED Brochure or contact us for more details.

American Excelsior Company will help you leave a Green Footprint on your next Design Project

ErosionWorks®

Recently updated Rainfall and Channel Erosion Analysis & Design software. ErosionWorks allows you to design and analyze your site and recommends successful solutions to match your projects requirements.

New features include:

- Good, Better, Best product recommendations
- Options of 100% biodegradable and desired functional longevity
- Material Estimator including quantities and budget costs
- Sediment Control products incorporated into slope analysis
- Report capabilities including your own savable/retrievable "my reports" section
- www.ErosionWorks.com

ErosionLab®

ErosionLab has focused on industry-wide advancement since it opened and is the largest privately owned testing facility of its type in the world. The goal of the lab continues to be advancement through education. Testing of erosion and sediment control products, educational field days, and research and development processed are only a few of the activities that help ErosionLab achieve its goal. ErosionLab is viewed by many organizations as an industry leader demonstrating commitment on behalf of the erosion control industry.
